The above information was effective as at September 2011, and is subject to change.

All vehicles are compatible with lead-free fuel.

All features, specifications and options subject to change without notice.

* Leather seat inserts and a combination of high quality, durable materials.

** Fuel consumption figures calculated according to ECE Directive 99/100/ EC using specific measuring procedures under specified operating conditions. These figures are therefore indicative only and may vary based on vehicle loading, climatic and traffic conditions, driving style and other conditions under which the vehicle is operated.

NEW SCIROCCO R

Das Auto.

HYPNOTIC HANDLING

All the power in the world is worthless unless you can feel it at your fingertips. And the Scirocco R has just the right combination: speed-sensitive power steering, a Transverse Differential Lock (XDS Lock) that provides outstanding traction characteristics and a unique sports suspension ensures optimal handling at all times. The optional Adaptive Chassis Control (DCC) ensures the Scirocco R's suspension is constantly adapting to suit the road and driving conditions. If it's a more casual drive you're after, the standard Cruise Control will make the journey as effortless as it is enjoyable.

DARING DESIGN

From any perspective, from every angle, the design of the Scirocco R exudes glamour and elegance. Whether it's the gloss black grille with LED daytime running lights in the front bumper, the body-coloured flared side sills, the pronounced rear spoiler or its chrome twin exhausts placed assertively visible there can be no mistaking that the Scirocco R means business on the road.

ILLUSTRIOUS INTERIOR

The ultimate driving thrill in supreme comfort. Sportiness and luxury combine in the cockpit of the Scirocco R. The heated leather* sport seats support the driver, while the leather multi-function steering-wheel and aluminium gearshift handle are inviting to touch. Chrome detailing, blue dashboard lighting, grey stitching and the R emblem add a touch of class to refined passion.

STEADFAST SAFETY

Safety always comes first and the Scirocco R boasts the latest generation Electronic Stability Programme (ESP) with Brake Assist and Electronic Differential Lock (EDL). Coupled with this are Electronic Brake-force Distribution (EBD), Anti-Spin Regulation (ASR) and Hill-Hold Assist. Front, side and curtain airbags, safety-optimised head restraints and ISOFIX child seat preparation at the rear ensure all passengers travel in safety.

POTENT PERFORMANCE

Raise your peak power while maintaining economy and style. The 2.0 TSI engine packs 188kW of pure refined passion, propelling the Scirocco R from 0 to 100 in a hair-raising, pulse-racing 5.8 seconds (DSG® model). Add to that a maximum torque of 350Nm between 2,500 and 5,000rpm and a top speed of 250km/h and you're left with one nagging question: can your heart handle it?

FERVENT FUEL-ECONOMY

Can a car this powerful really be this efficient? Thanks to the cutting-edge technology in its small but advanced Turbo-charged Stratified Injection (TSI) engine, the Scirocco R shows remarkable fuel economy: a mere 8.0l/100km (equivalent to 187g/km of CO₂ – DSG® model). All of which means it provides unbelievable performance with a cleaner conscience.
